in-context recommendations

in initial use, if user closes three recommendations (without trying) - all are OFF
> if then turned back ON by the user they remain ON until they are turned OFF by the user
> this does not apply for new features introduced?

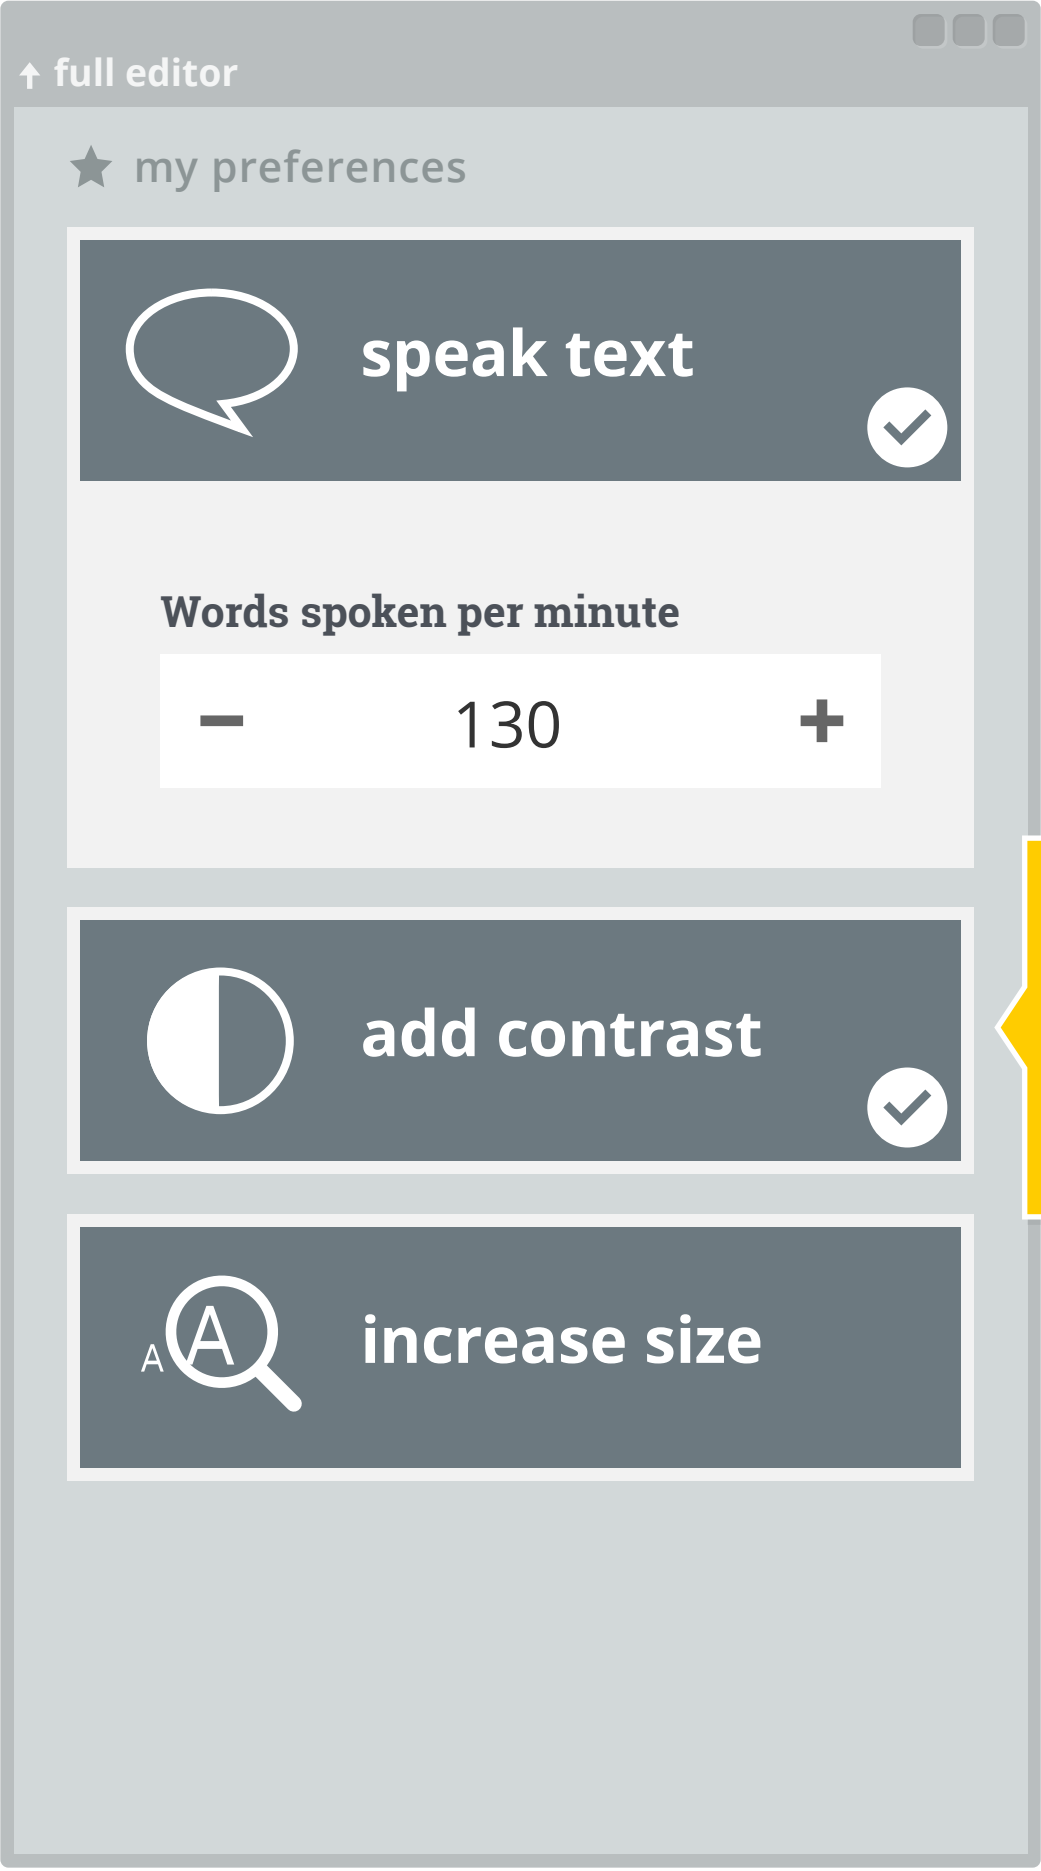

recommendation after ambient light level is low

×

Add contrast inverts the colours on the screen. When it's dark, it help reduce eye strain.

Try it out!

maybe second screen not nessessary?

×

Add contrast ON
