My Information History

The following information has been recorded about you, based on your computer and internet use.

How can I change this?

2016

- November 19
 - Google - you searched for "cute kittens" details
 - Google Maps - you were at Mr. Pet, 54 9th ... details
 - YouTube - you watched Cute Kittens video details
 - and 4 more
- November 15
 - PayPal - your credit card information was saved. PayPal has automatically saved your credit card information on its website. You can stop services from storing your credit card information by adjusting your privacy preferences under **Record - Who I AM**. details
 - Request to Clear History details
- November 8
 - Safari - you visited www.cutekittens.com details
 - LinkedIn - your contacts were shared details
- November 7
 - Google - you searched for "cats and rabbits" details
 - November 7
 - Google - you searched for "best cat beds" details
 - Amazon.ca - you purchased "Comfy Cat Bed" details
 - CatsRUs.ca - your credit card information was ... details
 - and 1 more
 - October 31
 - Safari - you downloaded "Cat.jpg" details

once user has blocked credit card saving, could they then be prompted/asked if they want to delete that info the next time they log into PayPal?

or - set a preference to erase history - and next time user encounters the service, they will be asked to confirm if they want to erase the history

except, it's not really a preference, because once the other preferences are set it won't be necessary

and what if user set preferences After history was recorded, and still sees it in timeline later on - would this be confusing? add preference changes to timeline?

Browser Tracking

Site-specific
Your behaviour will only be tracked by the site you are using. This helps the site owner understand who is using the site and how, and may also be required for the site to function properly. Once you leave the site your information will be removed.

- Allow site-specific tracking

Third-party
Your behaviour may be tracked by services or companies beyond the site you are using. This information can be used to create a "digital fingerprint" of you, and may be sold to and used by advertisers or others to create targeted advertising and/or to identify you on different websites or different devices. This may include purchases you make or ...

- Allow third-party tracking

Sticky
Your information will "stick" to your browser, such that it will not be removed once you leave the site, and can be used to identify you across the internet over time.

- Allow sticky tracking
