

Bucket icon status:

consumer view of available features

consumer view of unavailable features

author view of existing features (inactive/selected)

author view of non-applicable features (inactive/selected)

author view of missing and recommended features (inactive/selected)

media is inserted

Inserted media is focused and media widget (?) + bucket appears
arrow keys? or tab, to move focus into bucket?

hover state opens tool tip

video features selected - panel opens
as a pop-up window

can't see bucket when in pop-up: add on top?

pop-up panel is closed, focus returns to
placeholder

bucket remains until
focus moves off of placeholder

focus moves to other media, corresponding
bucket appears

captions selected - panel opens
as a pop-up window

show only one caption at first
then add one when done

how to deal with language default
or no language entered? "required field"?

captions have been added - captions icon status changes

Audio

An audio track may include a piece of music, a podcast, or the accompanying sound for a video.

☒

Not sure

☐

Video has no visual content

Done

next arrows and Done button:
what happens if user selects a next/back
arrow without selecting Done? does it matter?
what about Undo? how to make it clear
that Done button is for all panels?

next/back arrows fade out once editing
begins? Selecting Done closes
pop-up, so user can only move next/back
prior to editing?
