

Header options (and reorg of text for Inclusive Design Guide) for Inclusive Design Toolkit landing page

a: Interested in Inclusive Design?

b: Learn about Inclusive Design

The Inclusive Design Guide

Grounded in the Three Dimensions of Inclusive Design—recognize diversity and uniqueness; inclusive process and tools; broader beneficial impact—this Guide provides a starting point for anyone interested in Inclusive Design.

~~TIDG (?) The Inclusive Design Guide is a gathering collection (or delete word) of insights, practices, tools and activities that have grown developed out of the our ongoing work at the Inclusive Design Research Centre and the Inclusive Design Institute. Grounded in the Three Dimensions of Inclusive Design, this Guide provides a good starting point for anyone interested in Inclusive Design.~~

a: Need help creating inclusive educational resources?

b: Create inclusive educational resources

The Inclusive Learning Design Handbook

The Free Inclusive Learning Design Handbook is a free Open Educational Resource (OER) designed to assist teachers, content creators, Web developers, and others in creating adaptable and personalizable educational resources that can accommodate a diversity of learning styles and individual needs.

a: Want to personalize applications using JavaScript?

b: Personalize applications using JavaScript

Fluid Infusion Framework and Components

Infusion is a code framework for building personalizable and adaptive applications using JavaScript and other web technologies. It also includes a growing collection of user interface components, built on top of jQuery, that help make it easier to build user interfaces by mixing and matching accessible components and then customizing them to suit your unique context. Infusion's components are designed flexibly so that all their default features, styling and parts can be easily changed, replaced and added to.

a: Need to build better user experiences?

b: How to build better user experiences

Fluid Design Handbook

The Fluid Design Handbook is a How-to Guide filled with user-centred design (UCD) techniques you can use to learn from your users and design better user experiences. This ~~is by no means a comprehensive guide of design practices but rather~~ focuses on ~~a few~~ methods near and dear to us on the Fluid project (if caveat needed suggest adding this to the end of the sentence: and is by no means a comprehensive guide). **Please note that we are currently re-evaluating the content of the Handbook and are working to update it and incorporate relevant content into our other resources.**

IDRC home page

slight recast of “welcome, who we are”. Suggest making the opening text a primary focus

We are an international community working together to ensure that emerging information technology and practices are designed inclusively.

The IDRC is a research and development centre at OCAD University in Toronto, Canada. We are a group of open source developers, designers, researchers, advocates, and volunteers.

random notes (to be added to):

philosophy? Minimize navigation to focus on content?

3 dimensions

animate? add some delight
