

initial view of PCP for new user
(suggested presets shown and deactivated)

user selects all preferences
which takes them to the PMT

PMT

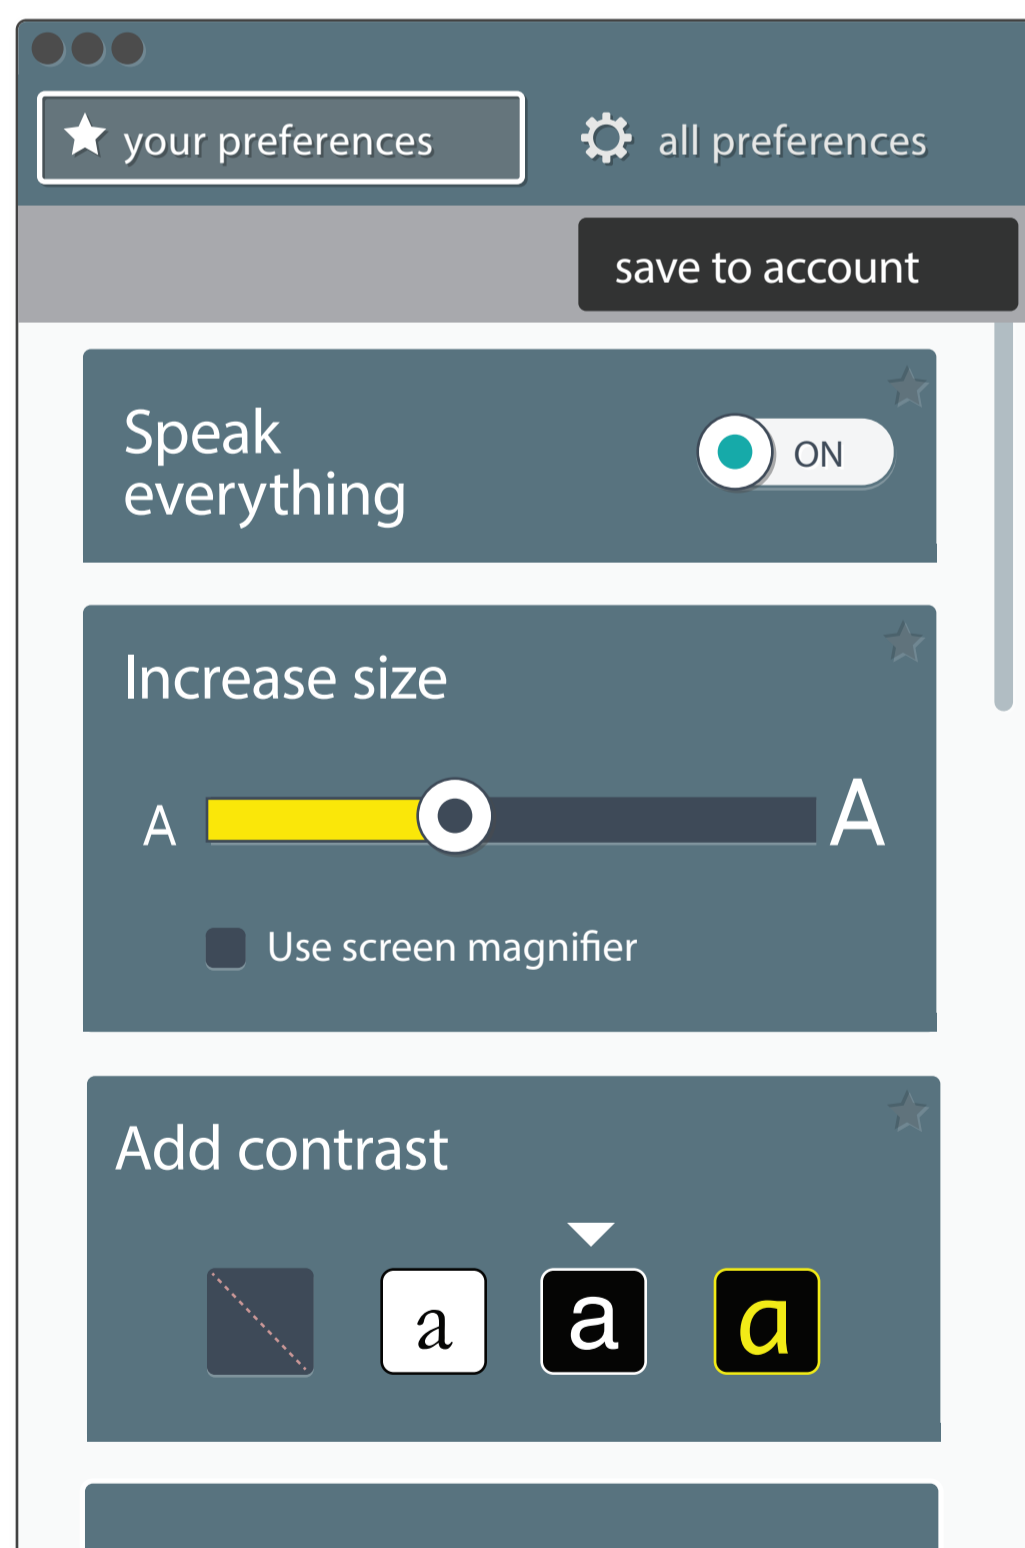

PMT search pane and categories (placeholders)
with recommendations based on common prefs

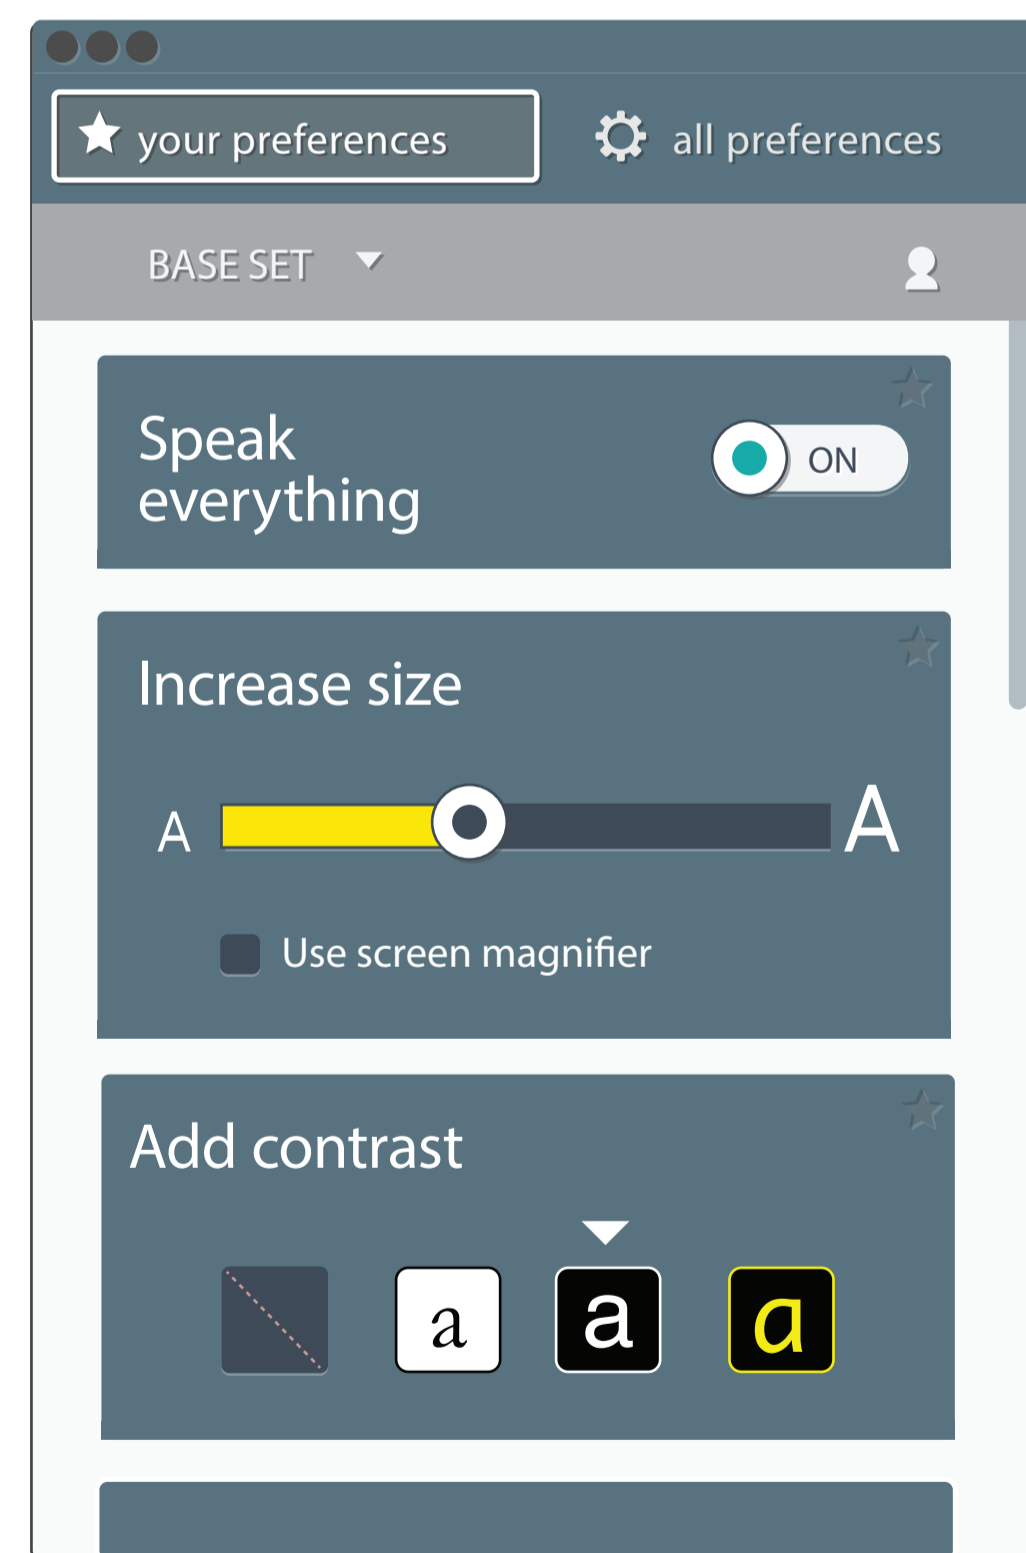

selecting a category or recommendation,
or entering a search term, will bring up
relevant presets and/or preferences in the PMT

selecting "all preferences" at any time will take user to PMT

subsequent view of PCP
(activated presets shown)

after making adjustments,
user selects save to account,
which creates a Base Set
(but user does not enter PMT)

opening Base Set takes
user to set list

selecting a set or "your preferences"
will return user to PCP
